

An insightful collection that draws inspiration from natural concepts of depth, distance and time, Moon Shadow combines different textural media to create dramatic yet delicate aesthetic juxtapositions. In development for more than a year, Moon Shadow marks an evolution in the designer's conceptual use of the relation between positive and negative space, and of the interplay between light and dark. The name itself as a nod to the familiar and dependable lunar cycles that have shepherded human civilization for millennia.

Moon Shadow is composed of three distinctive patterns offered in twenty colorways: Balazote; Eclipse; and Silhouette. All of the patterns are Class-A certified and are suitable for residential, retail and hospitality applications where an unusual, high-end look is sought.
