

WEITZNER

Hanging Instructions Magnetic Field W1002

Do not cut or install until you have read these instructions. Weitzner recommends hiring a professional wallcovering installer. For a list of professional installers, please visit www.wallcoveringinstallers.org

WALLCOVERING PREPARATION:

- Do you have the right amount of wallcovering yardage? If not, stop and contact your local sales representative.
- Make sure your tools, hands and workspace are clean.
- Never crease the wallcovering, and avoid touching the face.
- Inspect the wallcovering before installing to ensure it is free from defects.
- Install a **maximum of 3 sheets**, then inspect application. If satisfactory, continue. If not, discontinue and contact your local sales representative.

WALL PREPARATION:

- Make sure the surface you are hanging on has been properly prepared.
- Walls should be clean, smooth, dry and structurally sound.
- Repair any holes or flaws in the walls prior to installing wallcovering.
- We recommend priming walls before installing the wallcovering using Zinsser® Shieldz® or equivalent wallcovering-specific primer.
- Do not hang wallcovering directly on an oil-based primer.

TRIMMING:

- The edges of this wallcovering are factory trimmed.
- We do not recommend double cutting this wallcovering.
- Trim material at the ceiling, baseboard, windows and doors with a single-edged razor blade.
- Always use a new, very sharp blade for each cut to avoid fraying.

REPEAT:

- This wallcovering does not have a repeat pattern.

RECOMMENDATIONS:

- If you decide to hang multiple drops of this wallcovering, they should be trimmed and hung as they are unrolled. It is not recommended to reverse hang this wallcovering.
- Affix the wallcovering to the wall using a soft brush or wallcovering installation tool, and gently work out any air bubbles or wrinkles. Smoothing should be done from the middle of the wallcovering, working toward the outside edge.

Do not cut or install until you have read these instructions. Weitzner recommends hiring a professional wallcovering installer. For a list of professional installers, please visit www.wallcoveringinstallers.org

CARE INSTRUCTIONS:

- Water and clear liquids should be removed immediately by blotting with a clean, dry, white cloth. A dry-cleaning solvent should be used for stains such as coffee, red wine, and oil. Spot test the wallcovering with the cleaning solvent to ensure it doesn't leave a watermark.
- Regular vacuuming with a soft brush attachment may be used to remove dust deposits.
- CFA not available. Magnetic wallcovering. Variations in color and/or texture may occur.

SPECIAL NOTES:

- Use neodymium magnets only. These magnets are not recommended for young children due to a potential choking hazard.
- Due to the thickness of this wallcovering and the weight of the roll, temporary pressure marks may occur and will release as the product is adhered to the wall.
- If the exposed iron oxide under-layer is visible on edge, you can lessen the effect by using white school chalk on the raw edge.
- The weight of this item is above average (approximately 5lbs/yd).
- Not guaranteed against fading or color change. Avoid direct or brilliantly reflected sunlight.
